### Abstract of CN1052131

This adhesive is obtained by using a special sythesizing technology. Its main raw materials are acrylic acid and polyvinyl acetate, along with several fillers and amino-oxy silane kind of coupling agent. It is suitable for any wall surfaces such as indoor and outdoor whitewashed wall, painted wall and other walls based on cement, stone and wood. The decorative material can be fast and firm bound to wall without any treatment to wall surface.
